

Processing and Modeling

Problem 1:

Use these flowchart symbols to draw a flowchart that describes the raw data processing steps in the publication – <http://dx.doi.org/10.1371/journal.pone.0030098>

Start with the downloading of the data from The Cancer Genome Atlas and end with the computation of the generalized SVD (GSVD).

Problem 2:

Draw a flowchart that describes the modeling steps, i.e., the steps of interpreting the GSVD results.
